EDUCATION

NMIMS, Navi Mumbai (NMIMS University) *Expected 2027*
B.Tech in Computer Engineering CGPA: 3.01/4 (as of Sem 6)

TECHNICAL SKILLS

Core Languages: Python, JavaScript, SQL, TypeScript
Backend: FastAPI, Flask
Frontend: React, Vue, Bootstrap, HTML, CSS
Databases: PostgreSQL, MongoDB, MySQL, Firebase
Security: Wireshark, JWT, bcrypt
Tools: Git, GitHub, VS Code, Docker
Languages Spoken: English, Hindi, Marathi, German (A1)

EXPERIENCE

Full Stack Developer Intern, Reliance Industries Limited *May 2026 – Jul 2026*

- Contributed to GAIT, an enterprise web application, across the complete SDLC.
- Developed and enhanced the HR module using React (Vite), Python, and MongoDB.
- Built forms and improved data workflows using Reliance's no-code platform; collaborated on debugging, testing, integration, and feature implementation.

Web Developer Intern, Dani Endeavors (opc) Pvt. Ltd. *May 2025 – Jul 2025*

- Developed a responsive login page, admin portal and designed a digital ID card for MUHS University.
- Designed and built two landing pages and a complete responsive website for Bulls & Bears Trading Academy.
- Implemented responsive layouts and SEO optimization for improved usability and visibility.

Education Volunteer, Sahayogini Palak Sanstha *May 2024 – Jun 2024*

- Supported educators and developed Braille materials to improve accessibility for specially-abled children.

PROJECTS

Network Attack Path Visualizer *Jul 2026 – Present*

Python, TypeScript

- Built an attack-path visualizer using Vue 3, TypeScript, FastAPI, PostgreSQL, SQLAlchemy, and Docker.
- Implemented CVE mapping, risk scoring, JWT authentication, bcrypt hashing, and protected REST APIs.

AI Phishing Detector *Mar 2026 – May 2026*

Python, JavaScript

- Built an AI phishing detector using NLP, URL analysis, and scam-pattern matching for WhatsApp messages.
- Developed FastAPI APIs and Streamlit dashboards for real-time analysis, with 90+ phishing indicators.

Multimodal Emotion Recognition System *Feb 2026 – Apr 2026*

Python, React, JavaScript

- Built a real-time emotion recognition system using PyTorch CNN and DistilBERT for facial and text analysis.
- Developed Flask APIs and a React + Vite frontend with OpenCV face detection.

RESEARCH PAPER

Paper Title: Network Optimization in Edge Computing *Nov 2025*

Publication: Edge Artificial Intelligence: Foundation, Techniques and Application, Wiley Online Library

- Published a research paper on edge computing that explores network optimization techniques to improve resource allocation, latency and overall system performance in distributed computing environments.

CERTIFICATIONS

- **CompTIA Security+ Certification (SY0-701): The Total Course,** Coursera *Jun 2026*
- **Google Cybersecurity Professional Certificate (All 8 Courses),** Coursera *Aug 2025*

HACKATHON

Echelon '25 *Mar 2025*

- Built EduBoost AI's frontend for learning paths, course recommendations, and mentor matching.
- Integrated Google Gemini API and backend services for AI-powered learning assistance.
